ABOUT

We, Dezin Matrix, situated at Noida Sector 104, Delhi, We believe, good design is produced from careful study and research, combined with technical knowledge and artistic judgment. It's our aim to create spaces where people & activities thrive. Our team is capable of handling all the projects from the initial concept till the actual completion of the whole project.

It is the art, science, and business planning of a creative, technical, sustainable, and functional interior solution that corresponds to the architecture of a space, while incorporating process and strategy, a mandate for well-being, safety, and health, with informed decisions about style and aesthetics.

AWARDS

Interior Design & Architectural Awards strive to showcase excellence and bestow recognition to those in the fields of interiors, landscapes, spaces and the experiences created in these interiors as well,

Rachna Sharma
Interior Designer

INTERIOR DESIGN

A good design will make it more focused and efficient. When a space is well-designed, it doesn't just look good. Great design goes beyond decorating and luxury furniture to ensure that everything in the room serves a function.

One of the main benefits of interior design is that it can maximize the amount of available space. However, we also need to mention that design specialists will take comfort into account. Simply put, aesthetics and efficiency are linked to one another.

ICONIC ARCHITECTURE

Architecture is more than just constructing a building to provide a home. The architecture is aimed at improving human life; creating timeless, free, joyful spaces for all the activities of life. The most important task of architecture is also how it creates a way of life for those who live, work, or meet in it.

At its roots, architecture exists to create the physical environment in which people live, but architecture is more than just the built environment, it's also a part of our culture. It stands as a representation of how we see ourselves, as well as how we see the world.

FURNITURE

The furniture has more functional, practical, and visually lighter styles compared to what was obtainable in the previous eras. Modern furniture designs follow a simple hierarchy in their overall makeup. Here, there is an emphasis on form and function before artistic appeal.

MODERN LIGHTING

Expertly placed lighting adds another dimension to a space, bringing an interior design project to life. Great lighting creates depth and height, cozy spots, and draws attention to your most impressive areas. It's all about the balance of light and shade and bringing new energy to an interior.

COLOUR THEORY

Color theory is the science behind the way we process and interpret colors. It involves different types of color combinations, proportions of each color, and results in specific recommended uses of color.

Color schemes, in interior design specifically, are simply the organization and choices of colors placed throughout a space. These colors and their combinations can influence how a person experiences a room.

DECOR

Small pcs of Art effects adds more beauty to your Interior Spaces which refreshes and relaxes your mood.

Modern interior design is significant because of its capacity to produce a functional, comfortable, and aesthetically beautiful living space that represents the tastes and lifestyle of the people who inhabit it.

LANDSCAPE

Indoor/Outdoor landscapes can help lower stress and improve a person's mood. They can also filter out harmful pollutants, such as carbon dioxide.

Creating green spaces through the use of plants is a commitment to sustainable building techniques.

Building a terrace garden helps in keeping your home cool

INDOOR PLANTS

Besides the improved Zen-like environment and the aesthetic appeal, plants help reduce stress and tension, they can reduce background noise, they create a tranquil environment, greatly improve air quality and they can improve the overall mental health and well-being of a person.

ARTISTIC

Reinforce A Theme. When it comes to home interior design, artefacts have long served as reinforcing visual cues to address a specific style or a theme. For example, suppose your interior narrative leans towards relaxed contemporary.

SMART HOMES

Allows homeowners to control appliances, thermostats, lights, and other devices remotely using a smartphone or tablet through an internet connection. Smart homes can be set up through wireless or hardwired systems. Smart home technology provides homeowners with convenience and cost savings.

TURNKEY EXECUTION

A turnkey project is one which is designed, developed and equipped with all facilities by a company under a contract. It is handed over to a buyer when it becomes ready to operate business. Obviously, the company responsible for building a turnkey project does it for the cost as agreed in the contract.

Our turnkey teams ensure the seamless Delivery of the entire project as well as to fill the gap between the design, sites and the entire teams.

So that our client get the best out of it without any hassles.
